

MERV-1 Filter

Drain Hose

Condensate Pump

Specifications

Power	115 V/60 Hz
Current	5.3 A
Airflow	200 CFM
Noise Level	60 dBA
Weight	63.9 lbs
Dimensions (L x W x H)	15.2×14.4×24.8 in.
Coverage	2,100 sq. ft.
Filter	MERV-1
Refrigerant	R32
Operating Temperature Range	35.6-102.2°F
Draining Type	Pump Drain

Proven Performance

- ◆ The Hurricane 800 dehumidifier combines proven design with professional-grade performance and jobsite portability. Its rugged, dent-resistant housing offers superior durability for demanding restoration and water damage mitigation projects. A retractable handle and two durable rubber wheels ensure easy transport and maneuverability on-site.
- ◆ This commercial-grade dehumidifier removes up to 80 pints (AHAM) of moisture per day while drawing just 5.3 amps—providing efficient moisture extraction for spaces up to 2,100 sq. ft., making it ideal for both residential and light commercial applications.
- ◆ The Hurricane 800 features automatic defrost to maintain optimal operation in low temperatures, pump drainage for continuous water removal, a user-friendly control panel for precise humidity control, and automatic shut-off to protect the unit. It can be easily disassembled for internal service such as coil cleaning or pump replacement, simplifying maintenance for contractors and restoration professionals.
- ◆ Whether dealing with flash floods, heavy rain intrusion, or water main breaks, the Hurricane 800 is engineered to handle the most severe environments and assist with effective indoor air quality (IAQ) control and water damage restoration.

Features

- ✓ cETL Listed
- ✓ Automatic Restart
- ✓ Automatic Defrost
- ✓ MERV-1 Filter
- ✓ Easy Transport
- ✓ Adjustable Humidity
- ✓ Built-in Pump

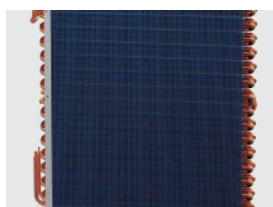

Quick-Access Filter

Carry Handle

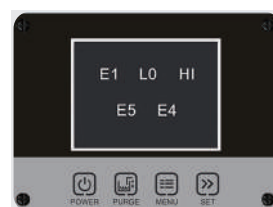

Heavy-Duty Rubber Wheels

Rare Earth Alloy Tube
Evaporator

User-Friendly Control Panel

Self-Diagnostic System

Application:

Bring Comfort Back to Your Living Space!

- ◆ The Hurricane 800 Dehumidifier is your professional-grade solution for effective water damage restoration and moisture control. Engineered for powerful performance, this compact and highly portable unit features a dent-resistant housing, retractable handle, and durable rubber wheels for easy transport and maneuverability on any job site.
- ◆ As a global leader in advanced indoor air quality (IAQ) and moisture management, we offer a broad range of next-generation dehumidifiers designed to rapidly remove excess moisture and accelerate the drying process after flooding or water intrusion.
- ◆ When your basement, office, or commercial space is at risk of flooding, prompt restoration is critical to prevent microbial growth, mold proliferation, and structural deterioration. The Hurricane 800 efficiently eliminates odor-causing moisture while maintaining EPA-recommended relative humidity levels between 30% and 50%—optimal for preventing mold and creating a comfortable, healthy indoor environment for occupants or safe, odor-free storage.

Why dehumidify?

- ◆ Prevents mold growth on household items, food, medicine, and books.
- ◆ Protects appliances, computers, cameras, and other sensitive electronics from moisture damage.
- ◆ Helps keep your home free from pest infestations associated with damp environments.
- ◆ Reduces prolonged humidity in crawl spaces and basements, safeguarding structural wood from moisture and rot.
- ◆ Controls excessive humidity in areas prone to mold, mildew, and fungus growth.

✓ Flood Restoration	✓ Structural Drying
✓ Carpet Cleaning	✓ Offices
✓ Basements / Cellars	✓ Laboratories
✓ Laundries	✓ Garages

What Can We Benefit from A High COP Dehumidifier?

- ◆ Say Goodbye to High Energy Bills and Uncomfortable Humidity!
- ◆ ABESTORM High-COP dehumidifiers offer an affordable, energy-efficient solution to your indoor humidity problems. Investing in improved indoor air quality and comfort has never been easier — these powerful units can pay for themselves in just a few years through significant energy savings.
- ◆ Homeowners can save up to \$250 a year on energy costs by using Abestorm dehumidifiers — and that's before factoring in the extra savings from reducing air conditioner use! By maintaining a consistent relative humidity of 50% or less, you'll enjoy a more comfortable home without cranking the thermostat to chilly, uncomfortable levels.
- ◆ Experience better air quality, lower bills, and year-round comfort with ABESTORM.
