

Filteair HEPA V3

Control Panel

Features

- Equipped with a larger more efficient filter than most competitors' units.
- Includes Pre-filter and HEPA /activated carbon filter.
- Filter change light indicates when HEPA /Activated carbon filter needs to be changed.
- Daisy chain capability - link up to 3 units on 1 power out , letStackable, lightweight, and easily transportable.
- They were made from rotomolded plastic for maximum durability. Both Inlet and outlet can be ducted.
- Suitable for use in homes, light industrial settings, schools, hospitality venues, and healthcare environments-wherever portable, efficient HEPA filtration is needed.

A Bigger Air Intake

Specifications

Power 2.5 amps, 115V, 60 Hz, Transpar- ent Indicated Lighting Plug	Duct sizes intake Intake: 16 in.	Duct sizes Outlet Intake: 8 in. Filter
Cord 23 ft Power Cord	Outlet 15A UL Rated GFCI Duplex Receptacle	Static pressure 2.8 in. (H2O)
Airflow 550CFM	Weight 37.4lbs	Dim(W x H x D) 25 x 21.7 x 14.2in
Sound Pressure Level <65DBA	Filters Pre-filter and HEPA/activated carbon filter	Loading quantity 20': 219 Sets; 40': 470 Sets; 40'HQ: 536 Sets

Proven Performance

- The Filteair HEPA V3 air scrubber, It is equipped with a bigger air intake than most competitors' units. It has a 16-inch air inlet for increased airflow efficiency.
- Pre-filter and HEPA/activated carbon filter are all adopted in the Filteair HEPA V3. Our unit is unbeatable when compared with competitor brands in removing airborne miscellaneous debris at 0.3 microns in size which include pollen, plant spores, mold spores, and pet dander. The Carbon filter captures the larger particles whilst the HEPA draws in the smaller particles.
- Filteair HEPA V3 is capable of cleaning air horizontally and vertically with an electricity consumption of no more than 3 amps.
- During restoration work and drying after water damage, the driving airflow can stir up particulates and particles adhering to the carpet or other materials. Then those dirty particles can be filtered by the device with clean, odor-free air.

Application:

- Filteair HEPA V3 is a versatile air scrubber and negative air machine with a portable filtration system with UV-C light. It is equipped with a bigger air intake than most competitors' units. It has a 14-inch air inlet for increased airflow efficiency. These filters efficiently remove particles from the air to help improve indoor air quality. That can effectively complete your water damage restoration tasks. Mold remediation works, fire damage restoration, dust control, odor control, and sewage remediation. In a standard Category 1 water damage situation, Water Damage places the Filteair HEPA V3 in the middle of the affected area. Air movers can stir up particles into the air. The Filteair HEPA V3 can reduce particle levels by filtering the air in the restoration process. Mold Remediation, in most cases, required the affected area to be well sealed. Space sealing techniques use the Filteair HEPA V3 to bring about a striking air cleaning effect. Formally trained remediation professionals use the Filteair HEPA V3 as a negative air machine without interruption for the duration of every remediation job. The Filteair HEPA V3 can filter up to 99.96% of particles with 0.3 microns or larger size, such as mold spores and fungi. Manifold Filters Besides the standard Pre-filter, Filteair HEPA V3 is also equipped with a HEPA/activated carbon filter which can capture a wide variety of volatile organic compounds (VOCs), including soot, smoke, food odors, fumes from paint, and paint thinners, sewer odors, and many other compounds. Individually wrapped filters with pellets ensure maximum airflow and maximum contact while minimizing filter dust.

10 Year Warranty
The Filteair HEPA V3 has a 10 years warranty.
